Inventive step (IS)			NO	
	Claims	4-7	YES	
	_	Claims	1-3, 8-11	NO
Industrial applicability (IA)	Claims	1-11	YES	
		Claims		NO NO
. Citations and	l explanations (Rule 70	17)		

2. Citations and explanations (Rule 70.7)

Document 1: "Synthesis and Antiviral Activity of Some New 1H-1,2,4-triazole Derivatives," (O. G. Todoulou, et al.), European Journal of Medicinal Chemistry, 1994, Vol. 29, pages 611-620 Document 2: WO, 98-31697, A1

Document 3: "Synthesis of C-glycosyltetrazoles Related to 3-deoxy-D-arabino-heptulosonic Acid 7-phosphate (DAHP); Potential Inhibitors of Early Steps in the Shikimate Pathway," (J. Grant Buchanan, et al.), Journal of the Chemical Society, Perkin Transactions 1, 1992, No. 20, pages 2593-2601 Document 4: JP, 6-199695, A

Document 5: "Inhibition of Lens Aldose Reductase by Flavonoids – Their Possible Role in the Prevention of Diabetic Cataracts," (Shambhu D. Varma, et al.), Biochemical Pharmacology, 1976, Vol. 25, No. 22, pages

Document 6: "Hypoglycemic Effect of Cecropia Obtusifolia on Streptozotocin Diabetic Rats," (Adolfo Andrade-Cetto, et al.), Journal of Ethnopharmacology, 2001, Vol. 78, pages 145-149

Document 7: "Hypoglycemic Effect of the Combined Use of Puerarin and Aspirin in Mice," (Zhufang Shen, et al.), Yaoxue Xuebao, 1985, Vol. 20, No. 11, pages 863-865

The subject matters of claims 1 and 8 do not appear to involve an inventive step in view of documents 1-7 cited in the ISR. Especially, a person skilled in the art could have easily conceived of compounds having a ring such as diazole or pyrazole from the triazole ring compound stated as compound 6a-j in document 1 and the tetrazole ring compound stated as compound 19 in document 3. Furthermore, document 2 (full text), document 4 (the claims), document 5 (page 2507), document 6 (compound 2) and document 7 (full text) describe compounds similar to the C-glycoside derivatives represented by the general formula (I) stated in claim 1, and documents 1-7 (full text) also describe that the said C-glycoside derivatives are used as drugs.

The subject matters of claims 2 and 3 do not appear to involve an inventive step in view of documents 1-3 cited in the ISR. Especially, a five- or six-membered monocyclic heteroaryl ring having 1 to 4 heteroatoms, selected from N and S other than triazole and tetrazole, could have been conceived of as the ring A, from the compound 6a-j of document 1 and the compound 19 of document 3, as described above. Furthermore, document 2 (pages 17-19) also describes that (1) the ring A can be a five-membered to fourteen-membered heteroaryl ring with 1 to 3 heteroatoms, selected from benzene, indene, N, S and O, and (2) the ring B can be a cycloalkyl with 1 to 10 carbon atoms such as perhydronaphthalene.

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of: IPC

Int. Cl⁷ A61K31/497,31/5377,A61P3/10,3/04

Continuation of: V

The subject matters of claims 9-11 do not appear to involve an inventive step in view of documents 1-7 cited in the ISR. Document 2 (page 46), document 4 (the claims) and documents 5-7 (full text) respectively describe that C-glycoside derivatives are used for therapy of diabetes. Claims 9 and 11 relate to a Na⁺-glucose cotransporter inhibitor, and a Na⁺-glucose cotransporter inhibitor includes a therapeutic agent for diabetes. So, a person skilled in the art could have easily confirmed the medicinal effects described in documents 2 and 4-7 using similar compounds.

The subject matters of claims 4-7 appear to be novel and to involve an inventive step, since they are neither described nor suggested in any of the documents cited in the ISR. Especially, the documents neither describe nor suggest a compound, in which (1) the ring A is a benzene ring, while the ring B is a saturated or unsaturated eight-membered to ten-membered dicyclic heterocyclic ring having 1 to 4 heteroatoms, selected from N, S and O, and (2) in the case where the said ring B contains a benzene ring, X is bonded to the ring B at any portion other than the benzene ring contained in the ring B.
